Portfolio: [Anvesha Khandelwal](#)

EDUCATION

Dayananda Sagar College of Engineering, Bangalore
Bachelor of Engineering - Computer Science and Engineering

SGPA: 9.42/10
2024 – 2028

SKILLS

Programming Languages: C, C++, JavaScript, TypeScript, Python
Frameworks: React.js, Next.js, Node.js, Express.js, Flask
Libraries: TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, LangChain, LangGraph
Tools & Platforms: Git, MongoDB, MySQL, Vercel, Supabase Google Colab, PostgreSQL, Jupyter Notebook

EXPERIENCE

Career Line Coaching Center

December 2025 – Present

Developer : React.js, CSS, Node.js, Express.js, MySQL

- Developed full-stack management system serving **500+** students with fee tracking, attendance, and timetable features reducing admin work by **70** percent.
- Built secure role-based portals using JWT authentication enabling teachers to manage records and students to view academic progress, currently handling daily operations for **30+** teachers and **500+** students.

Cognifyz Technology

November 2025 – December 2025

Web Developer Intern: HTML, CSS, Javascript

Internship - Remote

- Implemented responsive frontend components using HTML, CSS, and JavaScript with structured layouts and reusable code.
- Performed DOM manipulation, input validation, and debugging to improve functionality and cross-browser compatibility.

PROJECTS

BookMyStay | *Html, CSS, node.js, Javascript, MongoDB,*

[GitHub](#)

- * A web-based accommodation booking application with stay listings and booking flow.
- * Executed date selection and booking confirmation logic using JavaScript.
- * Created a responsive and user-friendly interface for browsing and selecting stays.
- * Built a client-side accommodation booking web application with structured stay listings (name, price, location, availability).

VoiceBridge | *RAG, Deep Learning, LangChain, Whisper, API, Python, Flask*

[GitHub](#)

- * Built AI voice platform with Whisper ASR + LLaMA3 LLM for real-time speech translation across 15+ languages using Python Flask.
- * Implemented RAG pipeline using FAISS vector DB + sentence-transformers for semantic search context-grounded QA over transcripts.
- * Deployed full-stack app on Render with user auth, SQLite history, PDF export CI/CD.

VsionVani | *TypeScript, Python, React.js, MongoDB, Tailwind CSS*

[GitHub](#)

- * Planned and developed a modern, responsive website with React, TypeScript, and Tailwind CSS, ensuring clean UI and smooth UX. Implemented a modular component-based architecture for better scalability and maintainability.
- * secure authentication and real-time features using Supabase to enhance user interaction.
- * Optimized the website using Vite and best frontend practices for fast load times and performance.

ACHIEVEMENTS & INVOLVEMENTS

- **DSA:** Solved over **150** algorithmic problems across LeetCode, InterviewBit, and GeeksforGeeks, strengthening problem-solving and data structures & algorithms skills.
- **Achievements:** Selected for the **ACM Summer School on Systems for ML** at VIT Vellore.

Ciesta 4.0 | *Tailwind CSS, Javascript, Node.js, PostgreSQL*

[GitHub](#)

- * Built and deployed the official website for CIESTA 4.0, DSCE's Computer Science fest, enabling smooth event discovery and participant registrations through a responsive and user-friendly interface along with an admin dashboard for real-time registration tracking and data management.

CERTIFICATIONS

CPP Programming: Infosys Springboard
Python Programming: Infosys Springboard
